

Nisha best build

Best nisha build level 30. Best nisha leveling build. Borderlands tps best nisha build. Best nisha build level 25. Best nisha build level 70. Borderlands pre sequel nisha best build.

Some people here have ... and it is patently false that there are no suggestions that improve their construction ... with this amount of pencide and an explosive explosion out of their main weapon, adding Cryo at your line is a rebran. 2 capstones on the 50 and 3 capstones on the level 70, not much space for the uniqueness in the first place. I realize that eclipse / eos is not a benchmark, I only used them as a way to show how strong the construction is, so if this can do this with them, obviously, this destroy all the rest. You probably noticed that I was using bottled courage in some of the video, but the construction dps was much better with faster "in you, so now I used it. Obtained guaranteed as a mission reward o. Rippled guns with little propagation, such as beam lasers, Vladof ARS or Jakobs Reververs work well with their skills (Bona fide grit, implaffed, bottled courage, wanted) in until 5 each, doubling its effect. It can be a bit complicated in early levels because its self-support is very situational, But later, you will constantly trigger these. Jakobs / Crit. 2 Tanned I think Canon luck can totally replace Maggi and. Just search for the ancient Freams or look at some latest topics about the luck cannon: Lucky cannon vs Maggie if there was any doubt about how he broke the lucky cannon o with nisha à ¢ â € £ | Luck Cannon vs. The additional damage of incoming tick (which stack BTW) is only sauce on top of everything. It's probably a personal thing, I just hate being :espilce :espilce ratam arap ³As sodnuges 03 e sotunim 2 ^aAcov avel euq iuqa o£A§Aurtsnoc aus sv. ratam ed sedadilibah ed Inferno in the time it takes your construction to kill the eclipse, I almost finished rubbing the floor with EOS. A slot for absolute zero or SMG Cryo to optimize the use of more cryo municipation against Badass is always sensible. In time, I would take cryo freeze an enemy and move to my lucky cannon, the enemy and move to my lucky cannon, the enemy and move to my lucky cannon, the enemy and move to my lucky cannon against Badass is always sensible. lucky cannon first. I think fridgia needs any chronicle 2 freezing buff tanned too, I know that the ELPIS mod sconerizler for Nisha seems to be really incredible, but in terms of DPS - is less general. Now, the Maya backdraft with a transformer and slow hand shock in bl2Ã ¢ â € € | That was an unique construct. It was the golden pattern on it. And if you are, how can you affirm that your construction is more powerful without it ??? Find something memorable, join a community doing well. You claim to have tested all the constructions in the brother ... I seriously doubt. I'm not a fan of your body-to-body skills. This compilation does not need more increases for the weapon damage, as it is already maximized, using blue rarity with is what makes this construct much stronger. I have played as Nisha for a long time, in fact she is the only character I play, and experienced with many Nisha constructions. You do not mind choice, a pair of points in Bona Fide Grit helps a lot with self-support. If you feel that you are becoming very soft, you can invest to the law and order order to get some volume and benefit from the damage you take. The increase in damage from the base more than compensates for the BA'nus of the criter that you are losing. It depends entirely on your equipment. Once again, personal prefections I hope you are not taking what I say as chronicles (I mean, why would I do? Here are the gains and losses of using your suggested modification + mod class over my mod + Class mod. The whip has a winding weard and feels slow and weak. This was my final game construction: final: and Synergies: There are too many synergies in her skills to list them all, but here are a few examples: Extending your action skill using Ruthless also boosts Jurisdiction (regen in AS), High Noon (+15% damage for every second in AS) and The Unforgiven (ricochet during AS)One for Each of Ya (dual pistols) benefits from Snap Shot (better accuracy & handling when hip-firing) and Quick Shot (hip-fire damage & fire rate after reload)Rough Rider, Discipline, Blood of the Guilty and Thunder Crackdown all boost the Order stack cap, effectively boosting the per-stack buffs/effects of the tree. Thunder Crackdown's large melee attack cone synergizes well with the Haymaker shield, which transfers your status effects to any enemy hit with melee. The 3DD1.3 Oz Kit gives a lot of survivability by occasionally recharging health or shields and dropping care packages of health pickups and ammo on kill. My old build is almost identical) Point for point, my old Jakobs build may not be exactly like yours, but it¢ÂÂs DAMN close. Below you will find many videos showcasing my level 70 build in UVHM against many enemies in various parts of the game, a hyperlink list of all the weapons, equipment and skills, as well as many other helpful resources regarding the build. If you have taken some time to watch the videos above, hopefully you can appreciate just how great this build of mine really is. And it¢ÃÂs even more dramatic when you have tombstone active¢ÃkÅ Which you do very often. Like i have stated before, i have tested all your builds, and mine just works better, in all situations, there is not one Nisha build that could ever out damage mine in any situation, period. The chronicler of elpis is not terrible. Borderlands: The Pre-Sequel Nisha the Lawbringer [color=LightGray]Hey Everyone! My name is Charrisx and this is my build for Jakobs / non-automatic weapons. Below you will see there are dps numbers next to all of the weapons. This build level this is the 50 build here is a demonstration Level 26 video build on TVHM killing Knuckle flame. Because I did not think about it, well done little precision: triggered is wasted, but the FNU would be a pretty decent choice since these weapons of Jakobs. My Nisha's construction is very well optimized, and I spent many hours of testing and researching all the skills and weapons that the uses of compilation. Have you ever tried a Solitarian star? Pure Jakobs + 6/5 Crapshooter There are from the liberation. I play as 2 Grenades of Homing Cryo as I'm jumping towards him and opening fire with showdown, before making the showdown ends, he's dead, so less than 6 seconds, some people have shown of 1 shotding it, good for them with your aurelia and it 500 stacks of crap, how long does it take to get these batteries? Exchanging class mod would reduce the ability to fool the shot, and the trick shot really helps in those times if / when you lose a shot. 1 As the crapshooter looks better than the chronicler on paper for LC. Additional injury damage explodes in 66% of your hot lead shots is stronger. Obliged for your contribution. As for the category vs. two irons, Nisha is more out of the coward because of FFOB and OFOAY. Speaking of hot lead, I tested that with the crisX and is much better than crack, even with lucky cannons. And once again the croncler of the elpis is a terrible mod, you lose a lot to gain anything beneath for this construction I tested, and it is wasted in a construction of jakobs. 3DD1.3 Mitiga this a little, but you should still make use of more than 1 munition pool. Because I do not Our, well done. I Steamroll Iwajira, how do I do this? Anyway, this is enough for now. I just want to remember That I did not suggest that you swap for each other, I simply said that this is what I would do. I'm using a chronicler with to get the free extra skills, and I carry a friggia in my 4th slotà ¢ â € € | so 3 skill points, with and a single weapon ... as I said, close, conclusion. I will add more comments later as I have time. I saw many other constructions of Charrisx when he was testing. I can assure you that there is no better construct for Nisha that I have seen or tested. I added it to a laser dialer as an alternative weapon that you can carry for difficult situations when you need a quick matança to get out of the fight for your life. Clicking this dps number will lead you to a video of this weapon being tested against the eclipse to calculate the weapon dps. 2 tanned I understand your passion for your construction and selection with ... While you believe it is the best with your construction ... Do not move away from that affirmation € œhe BTW always warms my heart to see eclipse and eos being destroyed 3 tanned retrodenized here. No offense. The Before? Did not you literally see me rolling for all the failures of Badass in that fight against the boss? 1 Have to agree with others. BTW What are the best parts for the adaptive shield, all Ashin for the decent and the res? Changing around some low impact skills do not do this single. In addition, I do not think you even had time to read me before answering ... I never suggested putting a single point in fastest N you â € | There is no plue where you have it. (Not to admire considering how many skill points we arrived at the final game now Adjunct if I updated it to the level 70 (significant difference only would be beneficial. You will find that this construction is a little bit bit of other Nisha constructions you may have seen how he utilizes Rarine to go with Jakobs/non-automatic weapons. There is no need for both. Any respectable lucky cannon construction will have a Handful of Bullets, giving it a capacity of 4 ammunition, which means that 25 % of its shots will be 50 % stronger. Do you notice that purple com would decrease my crit chance by 6 % and my trick shot would be down 8 %, and I would gain the ability triggered? For example, if I kill eclipse with just Lucky Canyon like you do in your video with my build I can finish it in less than 1 minute. Another option: maybe try Six-Shooter COM too. It seems that people place an emphasis on Ruthless/High Noon. You wanted feedback, but you respond to people in the rudest ways. Etsy no longer supports older versions. Asking me to change things in my compilation is silly considering all the suggestions that people have made so far would only make the compilation worse. 3 Likes I saw your video and I think your compilation with Jakobs is good, I just ive tested your composition vs mine and I like my compilation better, his is also really the only other compilation similar to mine that I've seen published and while I think it's very good there are just a few things with his compilation that could be better. I prefer crack shot mainly because it's not conditional, works great with a little cryo (new explosive) and also works on armored targets, and works on armored targets, and works on armored targets, and works on armored targets are class mode. He has tested many variants of everything from ability settings to gear (class mode, weapons, oz kits, etc), and this Jakobs setting he has is the highest DPS output I've ever seen. Keep in mind that one critical hit of my build is over 7.5x sbokaj moc lit^o Ani a orar ogof % 53 samra ed acort ed edadicolev agracer ed edadicolev agracer ed edadicolev agracer ed sonad ed sanepa uotse ,asioc reuglaug uo aÃcov moc edur odnes uotse euq ohca o£Ãn o£Ãtne ,ued em aÃcov euq so§Ãereda soneuqep so oicerpa uE .MHVU on 07 levÃn on oducse e latot edºÃas ed 000.000.581 met espilcE .)AHSIN sasoredop siam sedadilibah sad amu ,OMI a e dod essalc ad edadilibah sat aro gA?arijawi mu edopa a ratnevni ed zapac are ue euq odnebas ,edºÃas aus ©Ã 000.000.511 e oducse ues ©Ã 000.000.011 e oducse ues ©Ã 000.000.01 esab Å onad o atnemua euq odnaredisnoc ,etnemlaicepse ,niraR ed soir; Trigger Percentage based on Magazine Size with 5/5 Skill Points - Post #149 I hope you enjoyed taking a look at my build and the videos I made. And I am not saying that, as an opinion, it is mathematical fact, the 2 extra pellets, even if they hit (which is not guaranteed, since the Rustler prefix reduces the accuracy) will do less damage than a typical critical relationship on the remaining pellets. yes, of course, they would die faster if I create, then change, and happen to get the money skyrocketed, 30 likesIf your blue rarity COM is the high Rollin crapshooter COM, then there are about 5 different constructions centered around that COM already Å! If I can offer a suggestion would exchange this with the purple rarity High Rollin crapshooter COM or the chronicler of Elpis COM I must say this synergizes well with Jakobs weaponary. If you find one, post it here with a video showing me that it's better and I'll test it and confirm it and I'll apologize for my lack and jack-like frustration, and please don't waste my time with some stupid lady fist compilation (for reasons it's important) bvias). I know you're getting "more" stuff, but that's not always necessarily better. Still, the impact of the switch is less, one way or another, you can too.
